

DRUM HEATERS & CUSTOMIZED TANK HEATING

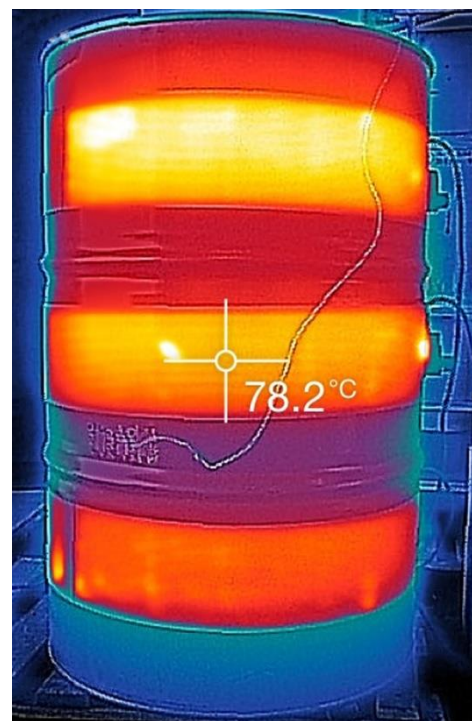

Liquid heating in drums and tanks is commonly needed in the industry. The extreme adaptability, flexibility and heat transmission of ATAG silicone mats make them the ideal tool to heat or maintain temperature in standard drums or big tanks. The easiness of installation and reasonable cost, make the ATAG heating products the ideal solution to enhance a new or existing process plant with heating.

CUSTOM TANK HEATERS

1000 litres tank. 18 KW 400 VAC heating with 2 ohmbelts

If you have a tank or container you need to heat up, ATAG is your perfect partner. We listen to your needs and supply you with both heating mats, sensors and temperature control systems.

“ We adapt our products to your needs ”

Custom designed to fit tank shapes, pipes and irregularities.

Bio reactor application with thermography checking. Heat is provided and transferred with perfect homogeneity, even on vast surfaces.
