SILICONE FOR FOOD AND BEVERAGE PRODUCTION INDUSTRY SOLUTIONS

Silicone rubber, with its superb temperature resilience, robust nature and non-stick properties, is a high-performing solution for food and beverage production.

Silicone rubber offers a wide range of properties that make it a perfect solution for the food and beverage manufacturing industries.

The superb temperature resilience, food suitability, robust nature and non-stick properties make it a great fit solution for:

- Gaskets for food processing machinery
- Food transfer tubing
- Dairy tubing
- Vending tubing
- Breweries
- Antimicrobial belting
- Industrial oven seals
