

ATAG

SERVING INDUSTRY SINCE 1947

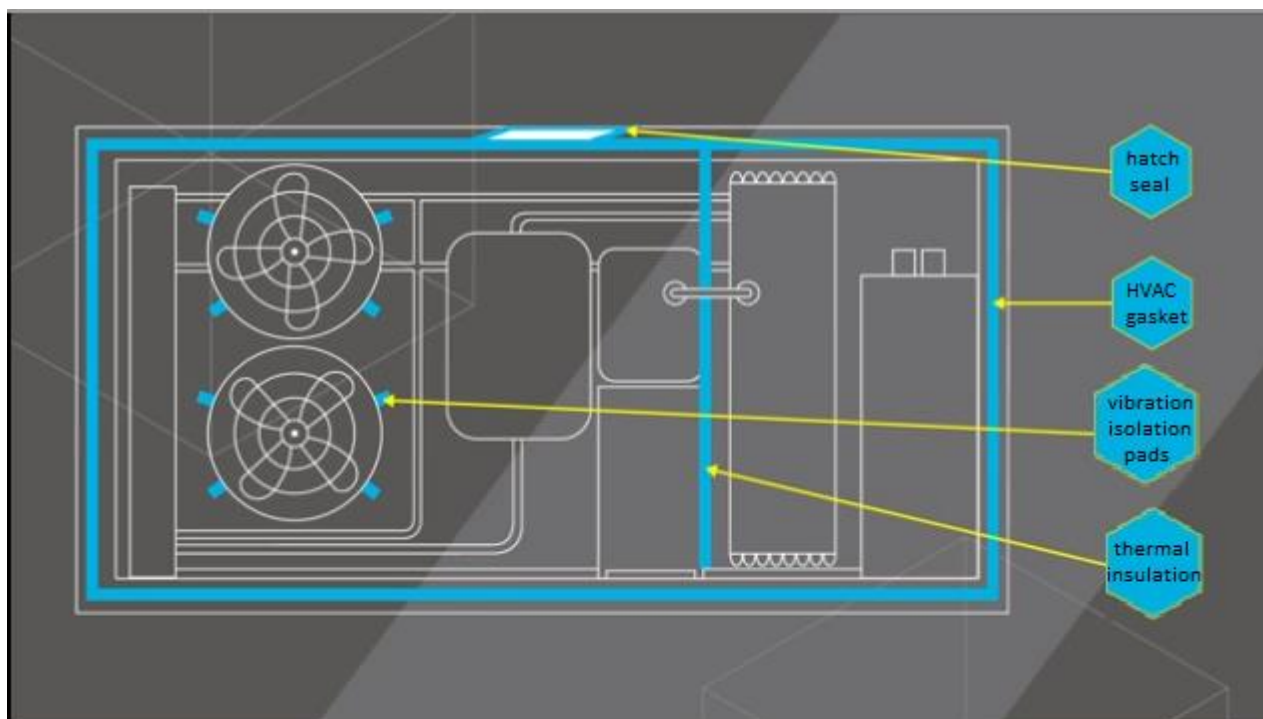

SEALING, INSULATION AND PROTECTION FOR HVAC SYSTEMS

Thanks to its robust properties and ability to withstand high temperatures, vibration and environmental constraints, silicone rubber is the perfect solution for commercial or domestic heating and air conditioning systems.

Common factors that cause HVAC units to breakdown, such as seal and gasket failure, overheating and vibration damage, lead to unwanted downtime and significant maintenance costs.

ATAG offer highly robust and reliable solutions that prevents system failures.
